Transfusion of blood and blood products helps in saving millions of lives every year during emergencies such as accidents, conflicts, natural disasters, and childbirth etc. It also helps patients suffering from life-threatening conditions to live longer and with better quality of life. Donation of blood also supports complex medical and surgical procedures. To raise awareness for the need of safe blood and blood products & to thank voluntary blood donors for their life-saving gifts of blood, World Blood Donor Day has been observed on June 14 annually since 2004.
